

## **It is Time for Your Child's "Other Check-up"**

The Appleton Area School District encourages **all children** to come to one of the 3-5 year old developmental screening days to participate in a screening prior to entering kindergarten.

This is your child's "**other check-up**" to make sure your child's development is on track. However, you do not need to have concerns to have your child screened. **We love to see typically developing children.**

All children between the ages of 3-5 years of age who are not enrolled in kindergarten, and live in the Appleton Area School District can call to schedule a developmental screening.

To schedule an appointment for a Developmental Screening, please contact Carin Tijan at 920-997-1399 extension 2112.
