

Our Children Are Our Future

Did you know the brain develops more rapidly between birth and age 5 than during any other subsequent period? Learn how you can help your child reach his or her potential during this critical phase of development.

The Appleton Area School District (AASD) has established a new Birth - Five outreach program that will assist parents in providing active and engaging developmental opportunities for their children.

The AASD Birth - Five outreach program offers a valuable link to age appropriate school and community resources such as:

- Free 3 & 4 year old developmental screenings
- Summer School Kindergarten Readiness classes
- Family Fun Nights at your local elementary school
- “Story Time” for children birth to five and their parents
- Parent Support
- Family Resource Center activities
- Workshops
- Pre-literacy and reading activities

The ways your child develops and learns today are key to his or her future. Your neighborhood school is a source of support. Please contact your school’s Birth - Five Site Resource Coordinator to learn about additional opportunities that will provide your child with rich and engaging experiences.
